

Dear Student

High school is one of the most exciting times of your life. It's a chance to explore new opportunities, challenge yourself and to lay foundations for your future beyond graduation.

This guide outlines the broad range of learning opportunities available to you in TDSB schools. We have worked hard to develop programs to match every student's strengths, interest and career goals. Inside these pages, you'll find a wealth of information and on our TDSB website, you can read more about educational planning, specialized programs, course selection, diploma requirements and more.

Choices also features a listing of the services available to you through your school. It includes some career development initiatives and internet sites for further exploration. Make use of these resources, as they can provide you with the added support to ensure that your secondary school experience is a successful one. Follow your dreams – there is a whole world of opportunities waiting for you.

We're here to make sure you have the support and opportunities you need to succeed, because we believe in you! Please connect with your parents/guardians, guidance counsellors, vice-principal and principal to help answer any questions or address concerns you may have while making your choices.

As you explore the many career pathways open to you, I want you to remember one important thing: you know what you are today, but no one knows the promise of what you might be tomorrow. The choices you make and goals you set now will have an important impact on your future success. So recognize the promise within yourself, believe in it, and determine to go where it takes you.

A handwritten signature in black ink that reads 'Chris Spence'.
