- ▶ The standard incandescent light bulbs found in lamps and pot lights in many schools waste up to 90 percent of their energy by producing heat, not light. Compact fluorescent lights (CFLs) use only a quarter of the energy of standard incandescent bulbs and produce the same high-quality light! Energy efficient light bulbs will decrease your school's electricity use, which in turn results in fewer climate changing greenhouse gas emissions.

To receive free CFLs, get started by simply searching your school for lamps and overhead pot lights that use incandescent light bulbs and record the numbers on the form below. Consult with your head caretaker (since he or she would have to change the bulbs) and get permission from your principal to go ahead with this program.

Fill out the form below and fax it to us at 416.395.4610. Upon receipt of your form, we will visit your school to determine exactly what you need so that we can order (and pay for) the new bulbs for you.
