

NEW!!

Fluorescent Lamps and Light Bulbs

This program was first piloted by the TDSB working with the Recycling Council of Ontario. Together they developed a program that is now available to all TDSB schools and offices as well as being the basis for a province-wide program! For more information, go to <http://www.takebackthelight.ca/>

Purchasing questions?

Paul Wolf Electric collects and recycles fluorescent lamps and other bulbs containing mercury as part of its new contract with the TDSB.*

► Instructions

- Place expired lamps and bulbs into original empty cases and boxes (or use other boxes if original packaging has disappeared!).
- Tape up the end of the case or top of the box and write TDSB USED LAMPS on the side. Store until a new order is delivered.
- When an order for new fluorescent lamps or bulbs is placed using SAP, also complete the line "Pick up used lamps (full case only) n/c" and enter the quantity of cases/boxes that you are returning.
- When the new lamps arrive, give the delivery person the cases/boxes of used lamps/bulbs that you requested be picked up.

► Reminders

- Do not place fluorescent lamps in the garbage
- Recycle only full cases of used lamps.

* The practice of having the suppliers of goods take back their products and packaging is known as Extended Producer Responsibility (EPR). "Extended Producer Responsibility is an environmental protection strategy to reach an environmental objective of a decreased total environmental impact from a product, by making the manufacturer of the product responsible for the entire life cycle of the product and especially for the take-back, recycling and final disposal of the product."

- "Extended Responsibility as a Strategy to Promote Cleaner Products," edited by Thomas Lindhquist, Department of Industrial Environmental Economics, Lund, June 1992.
