## **Protocol for Staff to Access TDSB Schools During Closure: Child Care Addendum (COVID-19)**

*(Last Revision Date: June 19, 2020)*

---

This addendum has been developed to accompany the Protocol for Staff to Access TDSB Schools During Closure. It is intended to support child care programs to reopen in TDSB Schools.

- Child care staff may access schools for the purpose of preparing to reopen their child care programs
- Child care staff are responsible for ensuring screening has been completed prior to access as set out in the Protocol for Staff to Access TDSB Schools During Closure
- Child care staff must provide their own face masks or face coverings
- Child care supervisors must coordinate access with the school principal and follow established safety entry and exit routines in place for school community
- Prior to child care staff access, child care supervisors must provide principals and caretakers with a daily list of all child care staff who will be accessing the school, to support contact-tracing
- Access to shared space must take place outside of scheduled retrieval, and must be coordinated through the Principal and other school staff as required
- If child care staff require access after June 26, 2020, access can be arranged through the Facilities Team Leader
