

Elizabeth Simcoe JPS Project Update

September 4, 2026

COMMUNITY UPDATE:

TDSB Capital Services is pleased to provide the school community with the following update on the status of the addition and renovation construction project.

As we enter the 2026/2027 school year, the project continues to move forward on schedule. Interior demolition, excavation, and forming of the new foundation and footings for the new addition has already progressed significantly. The roof deck of the west gymnasium has been fully demolished with the new roof work beginning. Work on the new addition will continue through the school year, while the west gymnasium is anticipated to be reopened in Fall 2026.

The TDSB team and Corebuild, the general contractor, remain committed to the safety of students, staff and the public. Corebuild will schedule deliveries of construction material with the school schedule to avoid drop off and pick up windows. Ongoing construction has been cordoned off and will be monitored to ensure minimal impact to school operations while students and staff are attending school.

It is anticipated that streets surrounding the school will see increased traffic and parked vehicles while construction continues. Please observe traffic signage around the school and pay close attention to pedestrians.

Any concerns regarding safety should be directed to Alex.Tilley@tdsb.on.ca and Salvatore.Beltrano@tdsb.on.ca.

Please see pictures & descriptions of current works on the next page.
