

School Budgets and Fundraising

What is our goal?

To ensure that school budget allocations and fundraising meet the needs of all students.

How will we achieve it?

- Review both school budgets and fundraising over a three year period to determine the correlation between funds available to schools and student achievement and well-being (October 2019)
- Analyze all factors that should be considered in the budget process including fundraising and make recommendations to the Board (January 2020)
- Consult with parents, principals, teachers and other relevant stakeholders for input on allocation parameters so that in May 2020 the Board can approve an updated school budget allocation model and potential change to the Fundraising Policy (May 2020)

How will we know we are successful?

- The achievement and well-being gap will decrease while expectations remain high for all students.
- The budget process is influenced by the results of this review and consultation.
