

Secondary Program

What is our goal?

To provide all pathways and a wide variety of programs in the majority of our secondary schools based on insight gained from our students.

How will we achieve it?

- Use student voice from available data and past student consultations to guide and review our program offerings in secondary schools (2018 – 2019)
- Review environmental scan of all secondary programs and identify gaps throughout the Board (Fall 2018)
- Consider different student-identified delivery models (i.e., campus models, virtual high school, experiential learning, co-op programming) (2018 – 2019)

How will we know we are successful?

- Increased engagement of students, staff, parents, and communities because their voice, experience, identity, and expertise are reflected in decision making.
- All secondary schools and programs will provide multiple pathways and many course options.
- An increase of underserved students in all specialized programs.
- Progress will be reflected in Student Achievement Data, Student Census Data, School Climate Data, staff surveys and staff focus groups.
