Outdoor Seating - Picnic Tables

Picnic tables are a great way to add permanent outdoor seating to your school site. Picnic tables must be acquired through Purchasing from approved Board vendors. No design consultation or Board installation is required.

Best practices:

Site selection: Select your table site taking into consideration the following

- Choose an area with hard, level ground (e.g. asphalt)
- Look for areas that provide shade
- Avoid playing fields where possible
- Avoid high traffic areas (e.g. entry and dismissal areas)
- Avoid maintenance vehicle or emergency access routes
- Avoid placing close to low building walls (where tables could be used to access roofs)

Placing and Securing tables:

- Picnic tables should be placed either butting up against one another or with a minimum 2 metre distance between tables (to discourage jumping between and possible injury)
- Tables should be chained (where possible) to a post or another picnic table
- Tables should never be chained to trees or school perimeter fences
- Coordinate with your caretaker to order chains and locks through TDSB approved vendors

Approved Picnic Tables:

Contact your OA or Caretaker to order through SAP:

Create a Contract Release Order – 4600011380

Vendor# 3365 - Schoolhouse Products Inc.

Model number: F120 - Picnic Table (Spruce)
