

Creativity & Innovation-What the Research Says?

The Toronto District School Board (TDSB) undertook an extensive literature review on **creativity** and **innovation**. Below are highlights of the research findings. To learn more, check out the complete report.

- Creativity is a skill that can be developed through education

- Promote creativity for all
- Make the classroom a place of investigation
- Provide ample time
- Provide creative learning experiences
- Use classroom assessments which promote understanding & self-improvement

Consider using:

- Experiential learning
- Authentic learning
- Teaching for successful intelligence
- Student-centered learning

- Ensure a well-articulated view of future
- Official policy must include creativity & innovation
- Continued Leadership and Support
- Ongoing professional development
